

## Bài 3 trang 167 SGK Toán 4

**Đề bài:**

Rút gọn phân số :

$$\frac{12}{18}, \frac{4}{40}, \frac{18}{24}, \frac{20}{35}, \frac{60}{12}$$

**Lời giải:**

$$\begin{aligned} \frac{12}{18} &= \frac{12:6}{18:6} = \frac{2}{3}, & \frac{4}{40} &= \frac{4:4}{40:4} = \frac{1}{10} \\ \frac{18}{24} &= \frac{18:6}{24:6} = \frac{3}{4}, & \frac{20}{35} &= \frac{20:5}{35:5} = \frac{4}{7} \\ \frac{60}{12} &= \frac{60:12}{12:12} = \frac{5}{1} = 5 \end{aligned}$$
